DIGITAL TECHNOLOGY & COMMUNICATIONS – E-TRADING

- In the field of Informatics there is lack of staff in specialities of high standard training such as programmers, software developers, Java experts, and experts in developing applications for mobile phones, like iOS and Android.

Studies

Among the schools of Higher Educational Institutions and Technological Educational Institutions there are those of Electrolgy Engineering and Computer Engineering, the schools of Information Technology, the school of administrative Science and Technology and the technological school of Information Engineering and Automation. There are also some technicians of various specialities offered in the Institutions of Professional Training, such as those of informatics applications with multimedia, internet technology, teleinformation, nets, computer systems, etc.

Employment prospects

- The list includes experts in developing applications for mobile phones, programmers, experts in developing software, analysts of systems, developers, the net engineers, heads of the Internet field and developers of unified systems. Other experts with future prospects are those in charge of the quality or security of the information systems and nets, the managers of data bases or data centres, the hardware engineers and the experts of applying controls in the software development and material installation.

JOBS RELATED TO TOURISM

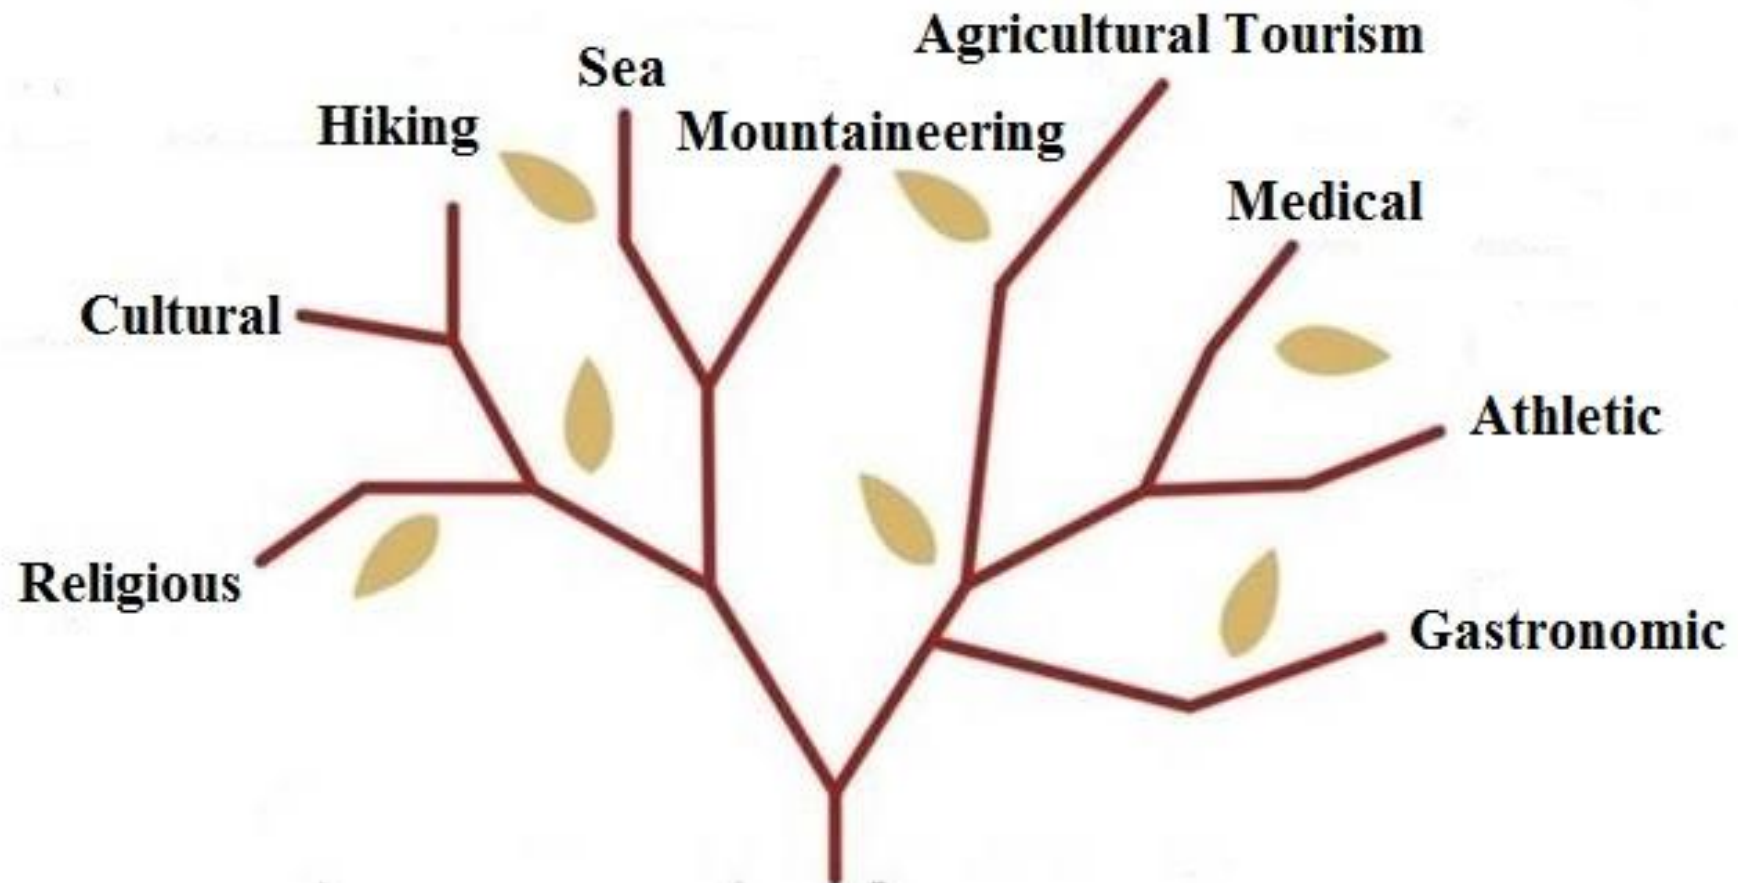

- Greece is one of the most popular destinations for summer vacation and it also provides interesting suggestions for thematic tourism throughout the whole year.
- The advantages of Greece are: its rich historical and cultural heritage, its natural beauty, the climate and its geographical diversity.
- With more than 16.300 km coastline and over 6.000 islands, Greece has dominated its position in the market of tourism worldwide. It presents unique investment opportunities in the particular field, with excellent prospects for progress and it leaves space for the development of private initiative in plenty of choices.

“Sun and Sea”

The classical tourist product “Sun and Sea” is a significant source of income for Greece, supported by the mild climate, the variety of sunny islands and beautiful beaches as well its hotel infrastructure.

Alternative forms of Tourism in Greece

- **Cultural Tourism:** its goal is the improvement and exploitation of historical and cultural monuments and museums in Greece.

- **Religious Tourism:** its goal is the improvement and exploitation of religious monuments in Greece.

- **Hiking and Mountaineering Tourism:** its goal is the promotion of environment and civilization as well as the simultaneous reinforcement of local societies throughout the whole year.

- **Sea Tourism:** its goal is to attract cruise ships and upgrade and reinforce vacation with pleasure crafts.

- **Agricultural Tourism:** is a form of tourism during which visitors stay in farms and participate in agricultural jobs. It contributes to the protection of the natural environment and the cultural heritage, whereas at the same time it raises the income of the people living in these areas-destinations.

- **Medical Tourism:** it constitutes an extremely interesting opportunity for development, under the condition that the specialized medical staff will be combined with investments to facilities and infrastructure.

- **Athletic Tourism:** it is associated to all the forms of energetic and pathetic participation to athletic events. The participation may be accidental or organized and can take place for business or other purposes.

- **Gastronomic Tourism:** in this kind of tourism travelers seek to experience unique gastronomic moments, familiarizing themselves at the same time with the history and the traditions of their destination.

Investment opportunities in the field of tourism in Greece

- The privatization of tourist and transport property.
- The construction of luxurious tourist resorts, with the help of investment motives.
- The development of specialized tourist products and infrastructure , focused on specific thematic units (gastronomy, culture etc).
- The launching of tourist products to new markets like Russia, China etc.
- The upgrading of local tourist infrastructure.

Job positions in the field of tourism

- Executive in organizing activities in different forms of tourism (sea, medical, religious etc.)
- Executive in travel agencies.
- Tour guide in historical sights.
- Executive in organizing cultural events, exhibitions, performances etc.
- Executive in commerce of specialized products concerning the sea or the mountain.
- Hotel employee.
- Chef, food and drink manager.
- Baker and confectioner.
- Executive in internet tourist marketing.
- Technician of tourist units and hospitality businesses.

Studies

- Higher Education – *Technological Educational Institutes

Business Administration- Administration of Tourist Businesses and Hospitality Centers

*They provide, apart from the professional rights, all the other positive elements of Higher Education, meaning the continuation of studies for a Master Degree or a Doctorate.

- Higher Education

Higher Schools of Tourist Education

- Publicly run college of further education.

- Privately run college of further education.

- Professional certification, which functions as a “ticket” of ensuring a job in tourist units.

The Institute of Liaison of Greek Tourist Enterprises works towards this direction.

Positive elements for the young

- Tourism is a developing and innovative industry.
- It is an easy start with opportunities of acquiring working experience for young people without experience.
- There is a wide range and variety of professions.
- Specialized knowledge or other technical skills ensure higher salary.
- The skills someone acquires by working in the tourist field can be used in different fields and positions.
- It gives you the opportunity to make other people happy.

The young people today must:

The young people must have patience and perseverance, start from low to reach high. Young people should combine their personal skills, abilities and talents with professions of the future, resorting to valid professional advice and targeting to the future with a positive point of view. Because the future belongs to those who prepare for it and fight for it.
